Wednesdays: Track Days

Saturdays: Interview Content

Livery of car, for IG story and post

Wheel and Car heavy focus in socials

Info on club and program

Helmet, trophies, other trinkets against backdrop

In-person Tournament, July 14th, Wednesday (Bahrain, Belgium):

Work out bringing:

-Banners/Promo from USF Esports and Bulls Racing from Print Center

-2019 car for display

-PC with Racing Wheel and PCs (Bringing PCs: Dakota, Olivia, Ayoub, Andrew, Antonio) for block times

-Setting up tables for club and program promotion

-FIVE STAR PIZZA

All registrants and “walk-ins” will participate in a qualifying lap on Bahrain to determine their block#, based on lap time. This way the blocks are separated by varying skill levels.

To keep track of times, we can set up a google sheet to log people’s lap time for qualifying and competition.

The top ? racers across the four blocks will qualify for the final race on the 17th.

(5 players x 4 blocks = **MAX 20 people qualified for finals**)

Once blocks are established, each block will race in a 25%, 30-min race with 5 players on controllers on the PCs in Belgium.

In between block times, people can use the PCs to do casual laps on different tracks. A PC with a racing wheel will also be set up to play on. Couches or other “hang out” areas for people who aren’t playing.

Online Tournament, July 17th, Saturday (Hungary, Spain):

The ? people who qualified from the 14th will race again on the weekend. There will be a total of two races, on two separate tracks, Hungary and Spain.

The stream length will be based on any pre-recorded content that is played, a one-shot qualifier, and a 25% race (which is about 30m). Pre-recorded content may look like an interview or clips from the previous in-person event, with highlight replays from the previous day.

Registration:

Students fill out the Qualtrics survey form, registering to race on Wednesday in-person (participants manually added on Toornament). Information section that will detail the event, where it is located, “come hang out and learn about esports and the club”, etc.

-U-Number

-USF email

-Confirmation they: own the game, have a PC capable of running the game

Students who register the day of must also confirm that they have a PC capable of running the game at home, and the means to purchase the game if they should qualify for the 17th

W2W Shifts:

Producer/Tournament Organizer:

Content Clipper:

Chat Mod:

Casters: Ayoub and Dakota and Bulls Racing members
